CONCEPT READY

Pre-made solutions for smart treatments

springer-berlin.de/en/

CONCEPT READY

The shortage of skilled workers is reshaping the operating conditions in medical supply stores and orthopedic businesses. At the same time, foot orthotics remain a central economic pillar of the company.

CONCEPT Ready provides clearly structured treatment options for different patient groups within an economically sustainable framework. Pre-configured solutions reduce workshop workload and ease pressure in day-to-day operations.

This preserves time and professional capacity for complex, individualized fittings.
